- ❖ **Database**: MySQL, MongoDB
- ❖ **Technologies and Tools**: Git, Git-Lab, GitHub, Bit-Bucket, Git-Extension, Microsoft Visual Code, Web-Storm, Apigee, Postman, Stencil.js, Adobe Photoshop CC, Microsoft Outlook, New relic, JIRA

Education

- ❖ **Master of Applied Computing**   January 2018 – May 2019
  University of Windsor, Windsor, Ontario
- ❖ **Bachelor's in Computer Science and Engineering**   August 2013 - March 2017
  BITS Edu Campus, Vadodara, India

Work Experience

- ❖ **Technical Systems Analyst**   Jan 2019 - Present
  Royal Bank of Canada, Toronto, Ontario
  Technology: Stencil.js, JavaScript, TypeScript, New-relic, Node.js, HTML 5, Apigee, Postman, Jive API, JIRA
  - Created a Chat Bot web component with stencil.js as my first Minimum viable product
  - Produced an independent web component that can be used in other front-end frameworks like Angular, React or Vue
  - Learned apigee for making API endpoints for 4 different Environment and tested in Postman
  - Developed more than 34 API endpoints that can be helpful for developers within the RBC
  - Worked independently to promote apis to different pre-production environment
  - Tested accessibility and screen reading functionality for external web component inside the web page
  - Followed Agile methodology for consistent development and collaboration with team

- ❖ **Front-End Developer and Mobile Application Developer (Freelancer)**   May 2018 – Dec 2018
  BePennyWise, Windsor, Ontario
  Technology: Angular, Ionic 3, TypeScript, HTML5, SCSS, Bootstrap, Angular material
  - Developed a Single Page Finance Advise web-application using Angular
  - Created REST and JWT web tokens to create Angular HTTP service calls
  - Code Debugging using developer tools in Firefox and Chrome
  - Developed and published mobile app for the same project for android and IOS via Ionic 3

Personal Projects

- ❖ **Full-Stack Web Developer**   March 2018 - April 2018
  My Camp Site: Site which assists users to find the different campgrounds nearby.
  Technology: Node.JS, JavaScript, MongoDB, RESTful Routing, Passport.JS, HTML, CSS, Bootstrap, Git
  - **Skills developed: Work ethic, Detail-oriented, Technical**
  - Simplified by RESTful routing for edit, delete and update routes
  - Implemented Passport.JS for authentication
  - Ensured Proper user authorization
- ❖ URL: https://github.com/likesidheart/My-Camp-Site

❖ **Full-Stack Web developer**   February 2018
   F1 Blog Hub: A blog hub to post different Formula 1 blogs.
   Technology: Node.JS. JavaScript, MongoDB, RESTful route, Mongoose.JS, Semantic-UI
   - **Skills developed: Analytical, Technical**
   - Created CRUD Operations by RESTful routing
   - Maintained the database using MongoDB
   - Alternative Bootstrap framework: Semantic-UI is used
   URL: https://github.com/likesidheart/F1-BlogHub

❖ **Front-End Web Developer**   January 2018 - February 2018
   My List: User can save the list of Movies, TV-shows and Games previously watched or played.
   Technology: Angular, TypeScript, HTML5, SCSS, MD Bootstrap, Firebase
   - **Skills developed: Adaptability, Interpersonal, Problem solving, Technical**
   - Improved performance by making application in single page
   - Designed a real-time database using Firebase
   - Applied authentication feature for multiple users
   URL: https://github.com/likesidheart/TYHD-list

❖ **Mobile App Developer**   August 2018 - August 2018
   Recipe-Book: User manually store recipes with ingredients and can add ingredients to shopping list.
   Technology: Angular, Ionic 3, TypeScript, HTML5, SCSS, Firebase
   - **Skills developed: Problem solving, Technical**
   - Created with Ionic 3 features for Android and iOS.
   - Implemented with Real time database and Authorization of Firebase
   URL: https://github.com/likesidheart/App-Recipe-Book

Academic Projects

❖ **Kung-Fu Yoga:** A Kung-Fu School management system   May 2018 - June 2018
   University of Windsor, Windsor, Ontario
   Technology: React, HTML5, SCSS. JavaScript
   - **Skills developed: Problem solving skills, Ability to work in team, Technical**
   - Worked as a front-end developer in a team of 3
   - Created components and implemented dynamic tables with search functionality
   - Gained beginner level knowledge of React
   URL: https://github.com/parth7676/KungFu-UI

❖ **Game:** Third person shooter game   September 2016 - June 2017
   BITS Edu Campus, Vadodara, India
   Technology: Autodesk Maya, Unreal Engine, Blueprint Scripting, Level designing and Testing
   - **Skills developed: Ability to work in team, Analytical, Technical, Flexibility**
   - Created 3D models using Autodesk Maya
   - Designed levels using Unreal Engine 4
   - Recognized by teaching staff for unique development

Technical Training

❖ Angular 6 - The Complete Guide: Online course, www.udemy.com   January 2018
❖ The Web Developer Bootcamp: Online course, www.udemy.com   June 2018
❖ Ionic 3 – Build iOS and Android Apps with Angular: Online course, www.udemy.com   August 2018
❖ Web Components & Stencil.js – Build custom HTML elements: Online course, www.udemy.com   January 2019
❖ React 16 – The Complete Guide, Online course, www.udemy.com   August 2019
